

Exercise their Minds Too!!!

Explore...Discover...Experience the Difference...Expand your child's horizon this summer by exploring the wide variety of youth programs available UW-Fox Valley, Office of Continuing Education. If your child is entering first or second grade in the fall of 2008 Ready Set Discover is just the program for them! For three days, they will explore art, science, and technology.

Students entering second through sixth grades may participate in College For Kids. College For Kids is celebrating its 10th year anniversary of expanding the horizon of children in the fine arts, communication arts, sciences, technology and more. To celebrate this milestone we are offering the school with the most registrations for Ready Set Discover, College for Kids and our MindStorms™ Mission...The Next Generation program a \$100 cash donation. For the older children entering grades 6th through 8th grade we have MindStorms™ Mission...The Next Generation which has been redesigned to include ROBOLAB™ and NXT Robot System. It will stimulate your imagination and creativity while letting you explore, experience, and express your world—a world without limits.

Children ages 8-12 can also attend Grandparents' U[®] at UWFox, an intergenerational program which brings grandparents and grandchildren together as they learn from each other in a dynamic atmosphere.

All programs emphasize hands-on learning and are open to students who have a keen interest in a wide variety of topics and enjoy learning in a fast-paced environment. Individuals may register on line at www.foxvalleykids.org, by mail or in person. Grandparents' U[®] at UWFox registrations are accepted in person, or by mail. Program brochures are available upon request by contacting UW-Fox Valley, Office of Continuing Education at 920-832-2636 or by email at theresa.littlejohn@uwc.edu subject line Summer Youth Programs.
